Thank you for purchasing JClaw Tek's Scorpio 51 LED UV Flashlight, the most advanced UV flashlight on the market today! The Scorpio UV Flashlight is extremely easy to use and you'll find it so fun that you'll come up with reasons to unleash its power on your universe. The Scorpio UV Flashlight requires 3 x AA alkaline batteries to function. We recommend Energizer or Duracell for best results. When loading the batteries be sure to insert the positive side pointing into the flashlight tube. To use the flashlight simply press the "On" button. **Although the UV Flashlight is waterproof we do not recommend you submerge it in liquid. Doing so will void the warranty. It is not meant for underwater sports! Warning: It's not healthy to point the flashlight directly into your eyes. Should you feel so inclined to do so, buy some UV protective glasses!** Should you have any questions don't hesitate to contact us at: support@jclawtek.com. Now go forth and conquer your world with the power of Scorpio!

Visit us at www.jclawtek.com

Warranty: The Scorpio is warranted against manufacturer defects for 1 year from the date of purchase. The warranty does not cover damage inflicted on the flashlight by the user, to include but not limited to, dropping and water damage. For warranty claims contact us at support@jclawtek.com.

Special Bonus: Email us at support@jclawtek.com for a coupon good for 15% off your next order of any JClaw Tek product!
